Hydrawise Irrigation Controller

Irrigation controllers have come into the modern mobile era, Hydra-wise from Hunter irrigation allow home users and contractors to remotely Control and monitor their irrigation systems.

Users can now Stop/Start, Skip and change watering schedules manually via mobile or desktop interface. Also Allows contractors to be alerted when something is wrong with the system to allow quick fixes or repairs. They can now also reprogram controllers to the correct water restrictions when they change.

Evergreen Blades is offering a Special deal to all new & existing customers as a Water Corporation Authorised Waterwise Garden Irrigator contractor #0373.

Hunter Hydrowise

Smart Irrigation Controller

System Advantages

Water Savings

Experience professional programming with key features like **Predictive Watering™** which automatically adjust start(ET) and time based watering schedules based on environmental features, thus, optimises the irrigation system. Ability to adjust zone triggers that offer your clients a fine-tuned watering schedule based on their specific microclimate.

Easily Identify Problems

Monitor the state of the piping system with an optional flow meter. Receive instant alerts on your phone in case of a broken pipe. Troubleshooting is made easy, for both you and your clients, which allows for rapid problem-solving and helps prevent property damage.

Instantly detect faulty wiring. The HC-1201 controller constantly monitors the electrical current flowing to your solenoid valves. If the current is too high or too low, Hydra-wise will alert you and communicate which valve is not working properly. This feature will give you instant notification before any plants suffer.

Other Features

- ▶ Store plans online so you never lose them.
- ▶ The Hunter Hydra-wise System works with and without internet.
- ▶ Ability to lockout access for users or restrict what a user can do, Great for rental properties to

restrict them from causing damage to your lawns and gardens.

Monitoring Service

Hunter Hydra-wise provide a free 60 months basic weather station monitoring based at Perth airport, We all know sometimes it rains in Perth but not here, so we can fit the optional rain sensor and change the programming so that if it does not rain at your place then it will continue to water.

You also have the option to upgrade your plan to be able to select unto 5 local weather stations such as Garden Island or private enthusiast via the Weather Underground weather network.

This upgrade also SMS alerts you when you have a fault with the system.

As a Hunter Hydra-wise contractor, we are able to program and monitor your system remotely (with your permission), This gives us the ability to reprogram, Pause, or even be alerted when there is a problem with your system. Allowing us to attend and repair your system quickly to reduce that water waste and save you garden/lawns.Options:

- ▶ SMS/Local Weather Station monitoring \$60pa
- ▶ 25mm Flow Meter \$350 Inc Installation
- ▶ Rain Sensor \$70 Inc Installation and Parts

*1Hr labour, does not include parts. Upgrade is to replace existing <6 stn controller only. Systems not fully operational prior to work, are subject to further charges where others works are required, eg re-wiring, replacing solenoids etc. optional exits are price for at the time of upgrade. Monitoring requires wifi connection.
